Abstract

Nowadays, English language is very important because Asean is coming. We have to use English language for communication, and change learning aid. From these reasons, it makes project management team want to create the application. It is an English virtual media technology for android application which can install into our smartphone. The purpose of project management team is focus on users that range 3 to 5 years old. However, general users can use this application. The application has a virtual images A-Z of fruits and animals which are animation 3D with sounds. It has 3 parts of game. Firstly, users have to match picture with fruits which name is Drag and Drop. Secondly, users have to fill the words in blank which name is Matching. Lastly, users have to choose true choices which name is ABC Choices. When we trial the application with kindergarten users, we can see that they are easier to study, and it can help them more interest in English language.
