Abstract

Planet Platinum SuperBike e-Commerce System offer an online business transaction and web base store to supplement a traditional storefront sale. The system include inventory management, balance of payment and customer services history record. The development tools include PHP , MySQL version 5.0.51a and Apserv version 2.5.10. The new product release can benefit from the online marketing campaign with substantial operation cost reduction. The developer hopes that this e-commerce system fulfills the expectation of the users and contributes to the future business growth.

Keywords: Electric Motorcycle / Motorcycle Buy Online Electronics / Electrical Motorcycle sales online.
